

2005-02

(Feb.) The AmRad Division introduces the Turbo®200 Universal Service Capacitor at the ASHRAE (AHR) show in Orlando, Florida. This device allows an air conditioning service contractor to replace any one of the 200 different single and dual value motor-capacitors used in air conditioning equipment. It was chosen as one of the most significant new items at that show.

An extensive patent program has been established around this new device.
